The_Hydra and cifs

On the PC (windowsXP sp2) I share a directory /hdd
This directory has a sub dir 'movie'

DB is conected by crossnetworkcable, internetsharing is on, windowsfirewall is on.

On the DB on the mount page I have (menu-setup-expert setup-communication setup-mount)

Dir: hdd
Localdir: /hdd
Options: rw
Extra: is empty (blank)
User: a (any letter or word will do)
Pass: a

Cross on the Automount

When The PC is running and I start the DB I get automounted and then when I press Txt on the channels menu mode I get list of all files from the hdd directory of the PC.
